CW TOP
100

ComputerWorld's Premier 100 IT Leaders in America

WE'LL IDENTIFY YOUR CURRENT CYBERSECURITY POSTURE—WITH NO JUDGMENT.

Everyone starts somewhere. Our goal isn't to scare you into compliance but to guide you to a healthy security posture.

We do this by:

- Performing interviews
- Reviewing documentation
- Conducting vulnerability assessments
- Preparing a current state assessment report
- Delivering a customized Compliance Scorecard

WE'LL PRETEND TO BE THE BAD GUYS AND TRY TO INFILTRATE YOUR NETWORK.

Hackers don't get into your network by accident. They perform targeted attacks. We'll do the same to find out exactly where you're strong—and where you could improve.

Penetration testing can include:

- Social engineering

- Web application testing
- External penetration testing
- Internal penetration testing
- Wireless network security testing

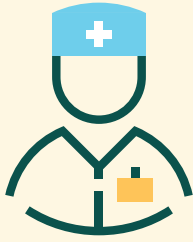

WE'LL CUSTOM-DESIGN A SECURITY PROGRAM UNIQUE TO YOUR ORGANIZATION.

Many of our team members have been where you are. They've built and run successful cybersecurity programs for companies of all sizes.

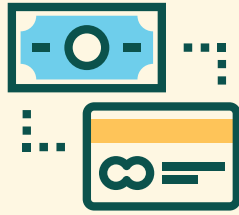

They'll use their expertise to identify risk factors and custom-design a security program that fits your unique needs.

AT LBMC INFORMATION SECURITY, WE USE OUR EXPERTISE TO GUIDE YOU THROUGH THE ENTIRE COMPLIANCE PROCESS, SO YOU CAN ENGAGE IN AN AUDIT WITHOUT FEAR.

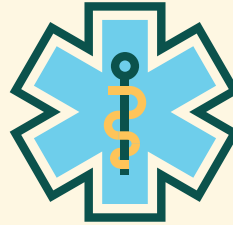

WE SERVICE ALL 4 BLOCKS OF THE HEALTHCARE ECOSYSTEM.
