

CLOUD SECURITY ASSESSMENTS

Protect your data in the cloud

LBMC

INFORMATION SECURITY

Why Choose LBMC?

LBMC Information Security is a leader in IT Security, helping mid-market and fortune 500 clients assess their cyber security, reduce risk, and protect their sensitive data. An LBMC Cloud Security Assessment evaluates your organization's current cloud security posture from a governance and administrative standpoint. It also reviews current security settings with recommendations and priorities for the most common cloud platforms like Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform.

Our Methodology

1 Cloud Governance

Ensuring your organization has the right processes in place to manage a cloud platform is critical to the success of the program. LBMC will conduct interviews, review documentation, and observe processes to determine the maturity of your cloud management and governance practices.

Coverage Includes:

- Policies & procedures
- Change management
- Visibility & monitoring
- Provisioning & shadow IT management
- Shared responsibility evaluation

2 Cloud Configuration Technical Assessment

LBMC's cloud configuration review will dive deep into the technical security of the major cloud platforms (AWS, Azure, Google), identify misconfiguration, vulnerabilities, and improvements.

Coverage Includes:

- Identity & Access Control
- Trust Relationships & Connections
- Logging & Monitoring
- External (Internet) Exposures
- Data Protection & Storage

3 Deliverables

The assessment deliverables will include:

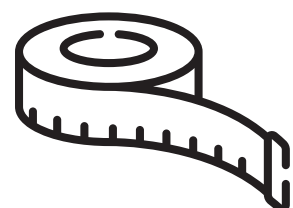

- Summary of the existing cloud environment
- Recommendations and observations for improving the security of the assessed environment to include technical & process recommendations

Key Benefits

Identify

security issues that could lead to a breach

Measure

your organization's cloud maturity

Ensure

security best practices are being followed
